

8) THE SMALLEST PARTICLE

“Everything in this Universe is comprised of the same electron existing in different time, at the same time.” - John Wheeler and Richard Feynman.

All as one is the **antithesis of God** but **One is all** stands apart as God.
You are God, I am God and so is my dog or a bowl of rice...

“Treat everyone that you meet as if they are God in drag.” – Alan Watts.

In the beginning, there came a force of denial that turned **eternity** inside out for the least time possible.

This is the universe in a nutshell.

The energy of the movement/seed is **Planck's constant**.

The seed grows by repetition.

The expanding universe is the same movement (seed) repeating to the demand of thinking - without frequential loss because the movement is supported by eternity.

"Draw from it as you will, it never runs dry." Tao Te Ching (340 BC)

Whether a tree, a flower or a human being, all things are spinning from eternity to meet the demands of thinking.

The universe is a movie playing; one frame at a time – each frame supported unconditionally.

The resistance that initiated the frame is the antithesis of God; it is the **first energy**; the smallest particle, and because it precedes, it is both cause and effect – everywhere at once.

The resistance that caused **Planck's constant** remains unquestioned for it is the illusive presence that exists in all things at once.

It is the **antithesis of God**.

The first energy is **thought** and we are the thinking of thought: one and the same.

"Same, same but different." – Buddhist.

No two frames are the same but **all as one** we create the life movie.

Thought direct all that it is with impunity.

"To get back to the real substance of all things, you must get back into the thought world. Until one knows that the thought-energy is the cause of which is back of all things, and the product only the effect, then he is tied to the effect and is limited by it." - Walter Russell.
