

THE CHALLENGE

There is no condition of living that comes close to the eternal state of love without condition.

The closest one may come is to experience a moment without interference – that which is called epiphany.

I experienced the universe disappearing to Love and decided to make sense of it.

Forty years later I have done just that.

All as one resisted eternity, turning Love inside out for the least time.

Our closest approximation to the value of this energy is **Planck's constant**: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

The energy repeats until resistance is reconciled.

The first energy is **thought** and as thought 'thinks' the energy rotates alternatively between positive and negative.

Each rotation is the beginning of time - energy in endless supply to support the demands of thinking.

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

Thought has free rein to draw energy on demand for Love cannot refuse its own.

Thought is the spinner and we are the spin.

One and the same except thought is high and above its spinning secondaries.

Like water to wine we go out to gather back.

One and all are challenged to transparency; to see through the systems of containment and regain status.

“Many are called but few are chosen” - Matthew 22:14

Few are chosen because we choose ourselves.

This is the challenge.
