

THE HAIRDRYER CHRONICLES

LIFE IS NOT REAL

*

It is an illusion to be figured out.

TOM KITT

PREFACE

I awoke to realize I was in energy.

Energy is movement!

Energy is not real; it is an illusion to be figured out.

“Whence come I and whither go I? That is the great unfathomable question, the same for every one of us. Science has no answer to it.” – Max Planck.

The following reveals how energy works.

“It is important to realize that in physics today, we have no knowledge of what energy is.”

- Richard Feynman.

Chapter 1

A PLACE TO BEGIN

The electric generator.

"Every living being is an engine geared to the wheelwork of the universe... "

- Nikola Tesla.

GENERATOR

The universe works just as a hairdryer or kitchen appliance: a rotating wheel producing output for work to be done.

Whereas the hairdryer is plugged into a local outlet the universe is plugged into eternity.

“Draw from it as you will, it never runs dry.” – Tao Te Ching

A SPARK TO FIRE

“Eternity is the source of energy.” - Nikola Tesla.

In the beginning there came a spark of resistance to **eternity**.

The spark repeats and the universe appears as a fire of sparks.

The spark is hidden in the fire.

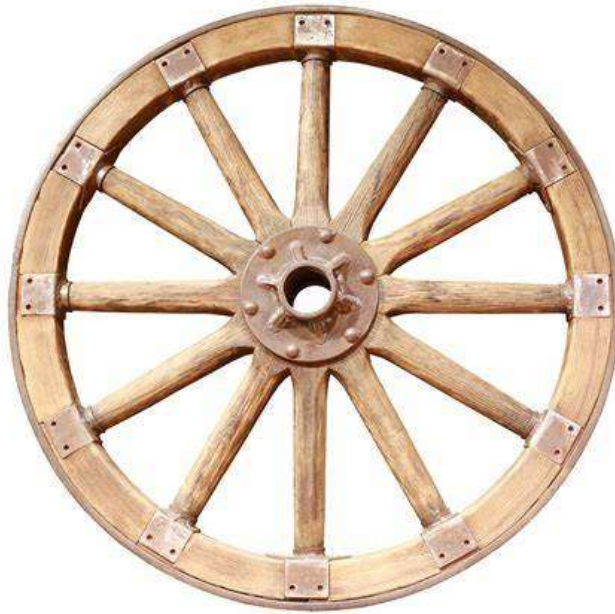

The cause of the spark is the antithesis of God.

The primal resistance is **All** as one - negative.

We are denizens of the fire.

THE CYCLE

A vehicle appeared to transport resistance into time.

The wheel is the **prototype** of the universe.

THE COLLECTIVE

“Eternity is the source of energy.” – Nikola Tesla.

In the beginning a spark of resistance appeared.

The spark is eternity inside out for the least time.

The energy of the spark is: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

This is **Planck's constant**.

THE ENERGY PYRAMID

“The whole is more than the sum of its parts.” – Aristotle.

The resistance that caused the wheel of life is the negative principal.
As the wheel turns it produces a mass of energy while remining the same.
The secondary mass is aligned hierarchically.
The negative principal at the pinnacle.

ABSOLUTION

All as one we dilute to serve the cause of resistance.

The negative principal is thought and we are the movement of thought.

Thinking is thought with a twist that enables us to have our cake and eat it too.

Ignorance is bliss!

"Hear no evil. See no evil. Speak no evil." – Lao Tzu, 340BC.

COOPERATION

The universe is the output from one rotating wheel.

Each cycle is the **beginning of time.** (eternal return)

We are what we think, we think what we know and we know what we learn.

If you discover the eternal wheel you will think less because you will know more;
you will move closer to eternity and be increasingly inclusive.

Finally, you will discover your own deception.

"The first principle is that you must not fool yourself and you are the easiest
person to fool." - Richard Feynman.

ENERGY FOR FREE

Resistance to eternity produced a spark of unlimited energy for the least time.

“Eternity is the source of energy.” – Nikola Tesla.

“Draw from it as you will, it never runs dry....” – Tao Te Ching, 340BC..

“Ask and you shall receive” - Matthew 7:7.

The energy of the spark is **Planck’s constant**: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

This is the quantum packet.

The universe is the secondary result of quantum repetition – a vehicle to drive - a spark to fire!

THE WAY

Energy cannot exist alone...

The **negative** principal has its opposite – the one **positive**.

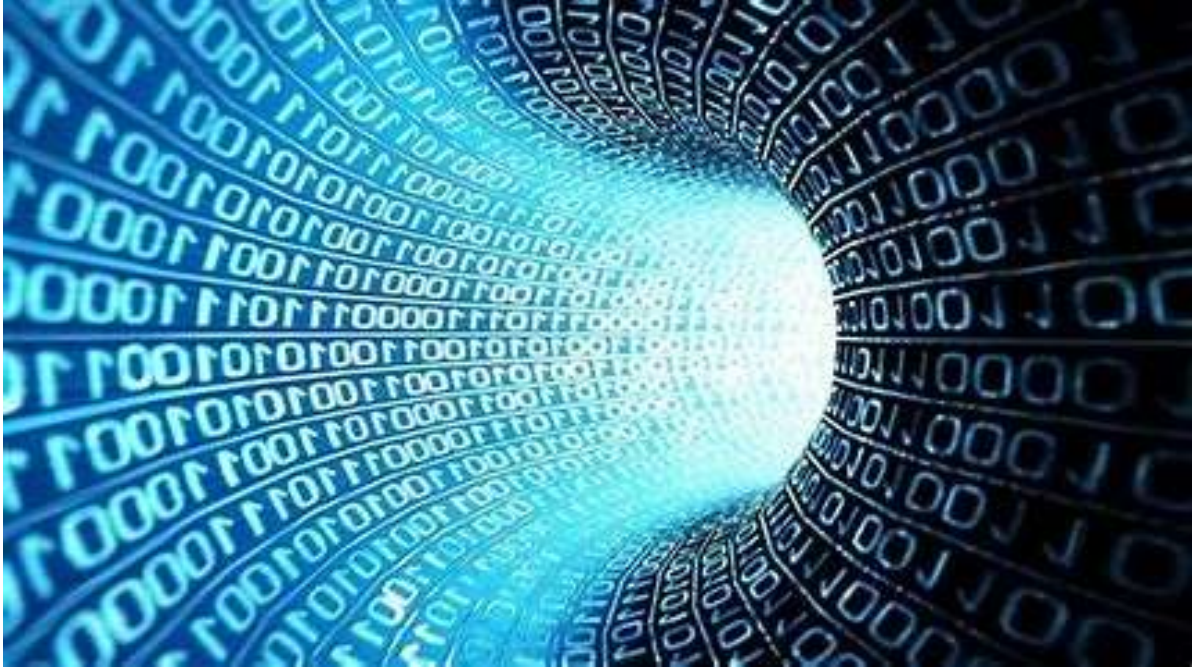

Energy is drawn from the well of eternity yet many believe they create their own cause and effect.

Everything glows with divinity and to claim exclusively in terms of this or that is to negate the ageless promise that each one **is** all.

When the body die's we remember ...and again and again we return and repeat the work - never in the same form but always in perfect form.

"I am different from ordinary people. I drink from the Great Mother's breasts." — Lao Tzu, Tao Te Ching.

KNOW ONE - KNOW ALL

The absolute truth: everything is One when not moving.

You are God, as am I and as is my dog or a gust of wind.

The potential of if each living thing is limitless.

The wheel turns, one cycle at a time to produces the algorithms of the universe.

Each repeat returning to eternity at the speed of gravity.

This incredible phenomenon is described by the **Theory of Relativity**.

NEEDLE IN A HAYSTACK

The universe is a mass of energy that began when resistance to **eternity** caused a spark of energy to appear.

The spark is hidden in the fire that follows.

The fire is the fabric of the universe.

We are bound to the fabric because we are turns of the same wheel – a needle at work.

Find the needle and you will discover the cause of the spark: that started the fire.

PLANCK'S CONSTANT

Planck's constant =

$$6.62606957 \times 10^{-34} \text{ m}^2 \text{ kg} / \text{s}$$

The universe is the secondary result of one eternally recurring movement.

The energy of the movement is **Planck's constant**: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

Planck's constant is a quantum of energy.

The quantum packet contains unlimited energy for the least time.

Eternal re-occurrence releases time/energy for humanity to discover its dilemma.

We build resistance to solve resistance but easier said than done.

THE IMMORTAL COIL

“Treat everyone that you meet as if they are God in drag.” – Alan Watts.

‘One is all’ means each thing is God.

We are wound-up coils to be released by thinking.

Energy began when resistance turned eternity inside out for the least time.

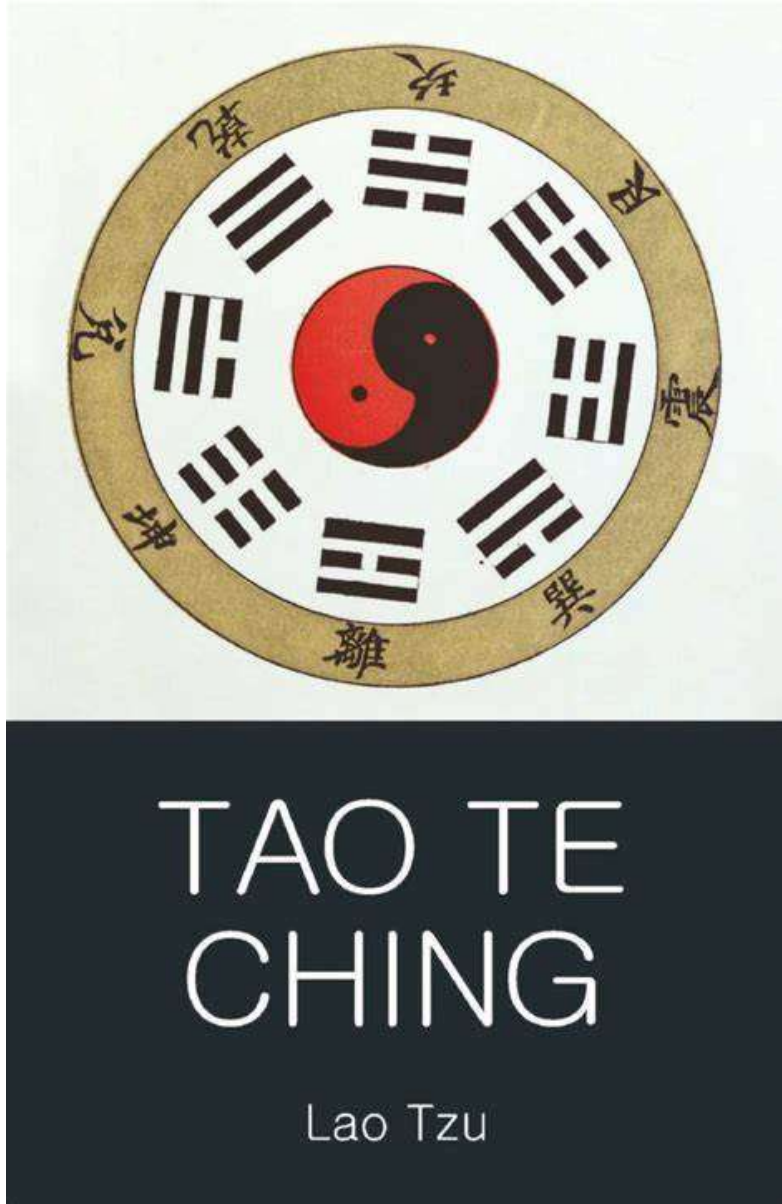

The vehicle of transfer is the **wheel**.

The wheel is **prototype** all else is the wheel turning: archetypes.

"Every living being is an engine geared to the wheelwork of the universe." - Nikola Tesla.

THE ONE POSITIVE

GENERATOR

God does not exist in energy.

The first energy: positive/negative.

This is **Planck's constant**. (the Quantum)

All things are the secondary result of quantum repetition.

Archetypes inundate the universe: take anything apart and you will find a rotating movement producing output.

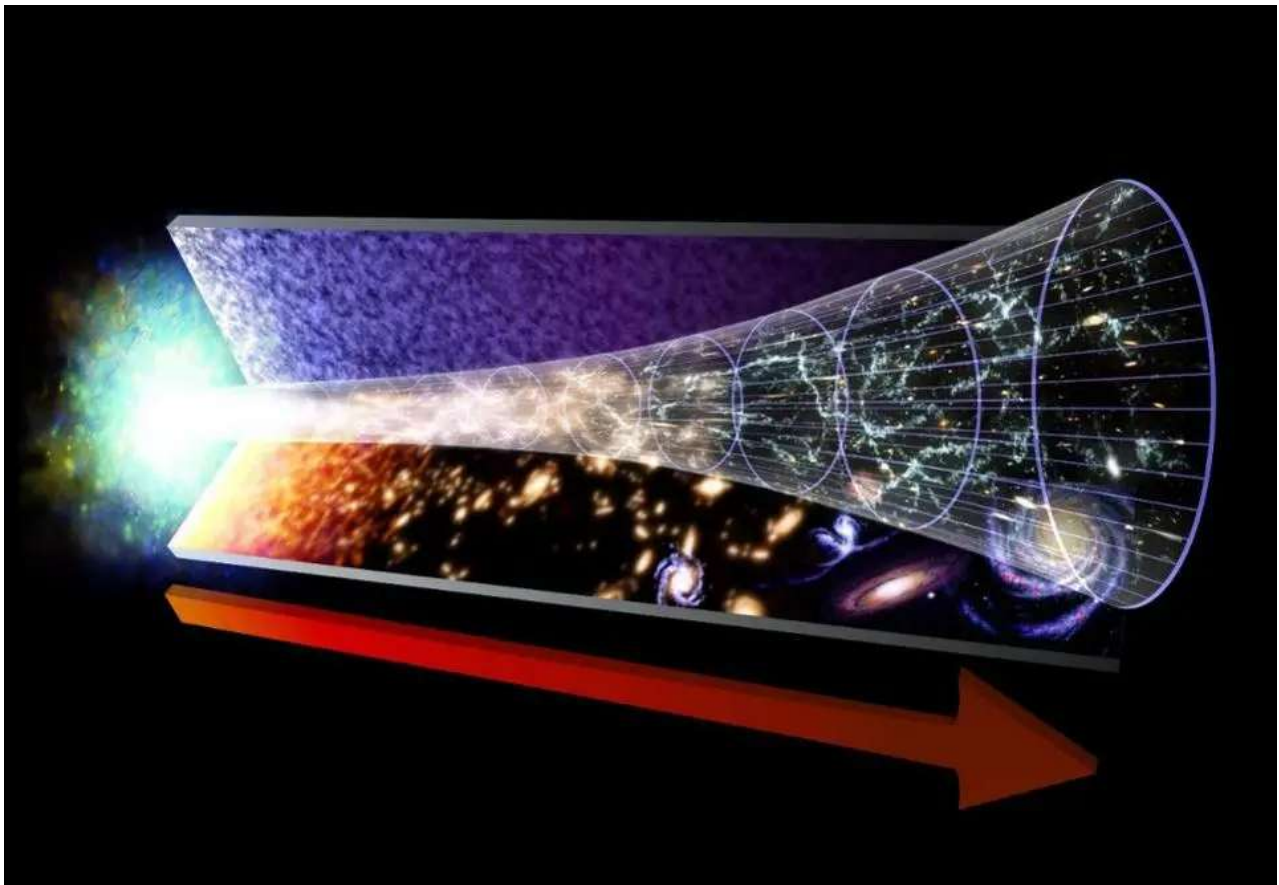

Negative evolves but the **positive** is close to home – sacrosanct.

It has a clearest view.

Chapter 2

THE DISAPPEARING UNIVERSE

How fast is the universe disappearing?

The universe is disappearing at the speed of gravity.

THE SOFT BANG

The 'big bang' is not as prescribed.

It is an eternally recurring movement whose energy is $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

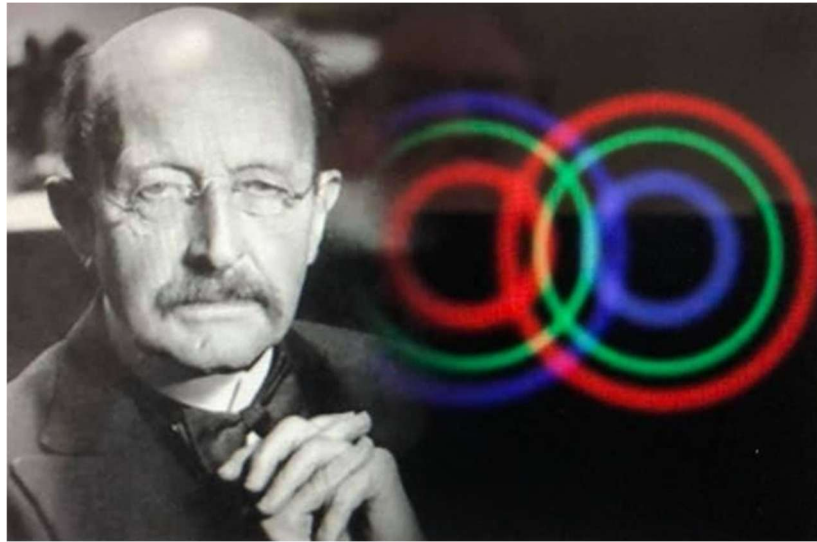

Planck's constant includes the energy of the primal thought/resistance that caused 'all as one' to deny who we are: God.

The original spark is so minute you could hold it in the palm of your hand and not know it's there, yet its re-occurrence produces the universe.

"Hold infinity in the palm of your hand..." - Wm. Blake.

THE CENTER-POINT

Everything is eternally re-occurring.

Resistance to eternity sparked energy.

The energy of the spark is eternity inside out/unlimited energy for the least time.

Repetition increases resistance; opening the window of **time** for the universe to emerge. (Ohm's law)

Planck's energy packet is the seed of the universe.

CONUNDRUM

The resistance that caused the universal seed is denial defined.

The energy of denial (antithesis) is included in Planck's constant.

The Planck **quantum** repeats as long as there is denial.

This is the **Law of Thermodynamics**.

THE MECHANISM OF THE UNIVERSE

Resistance to **eternity** was initiated by denial.

The denial is ours – **all as one**.

All as one is original thought.

Thinking is the movement of thought – a wheel turning.

Thought and thinking are inextricably bound.

Each turn of the wheel is fueled by eternity.

“Draw from it as you will, it never run dry.” – Tao Te Ching (340BC)

The eternal wheel feeds the universe for free, on demand.

THE PALETTE

“Every living being is an engine geared to the wheelwork of the universe.” – Nikola Tesla.

Everything is part and parcel of everything else.

Investigate anything you wish and you will find at its core a cyclic to linear mechanism.

All things are fed from the eternal wheel.

“Draw from it as you will. It never runs dry.” – Tao Te Ching.

Thinking is supported without objection.

This is the palette of thought.

DISAPPEARANCE

“Eternity is the source of energy.” – Nikola Tesla.

Planck's energy constant is a circle opening and closing to eternity.

It is more than a hundred years since **Max Planck** presented the world with his discovery of the Quantum.

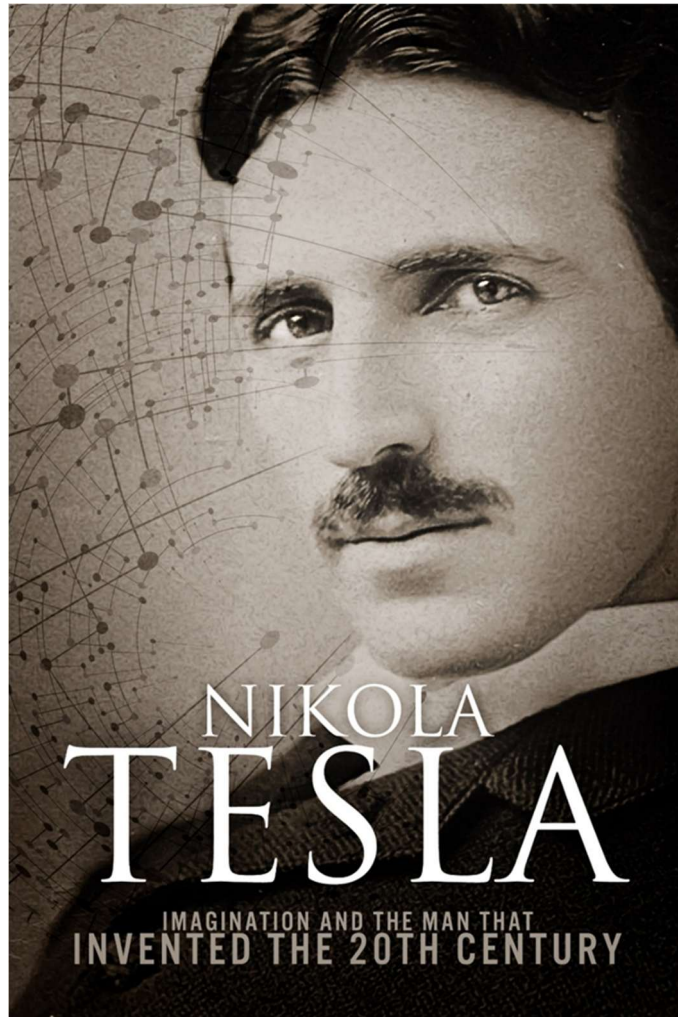

To reiterate:

The universe is the secondary result of the same quantum of energy going in/out of eternity ad infinitum/until we figure it out.

The universe is disappearing with each turn of the quantum wheel.

The speed of disappearance is the **force of gravity**.

NIKOLA TESLA

Nikola Tesla was inspired by Planck's discovery and set about putting it to practice. All of Tesla's inventions are practical applications of what is happening in any case. All are archetypes of original experience.

From alternating current to computers to hairdryers and everything else besides, the universe is inundated with archetypes of one eternal movement.

Take any item and investigate, sooner or later you will discover that the core of anything is a cyclic to linear mechanism – a wheel rotating to produce output.

Each individual cycle receives a full refill of energy, just as a vehicle at a gas station except for free.

“Draw from it as you will, it never runs dry.” Tao Te Ching (400BC).

THE ENERGY QUANTUM

Planck's constant =

$$6.62606957 \times 10^{-34} \text{ m}^2 \text{ kg} / \text{ s}$$

Planck's constant is a movement of unlimited energy for the least time – this is the spark of life that extinguished at the speed of gravity.

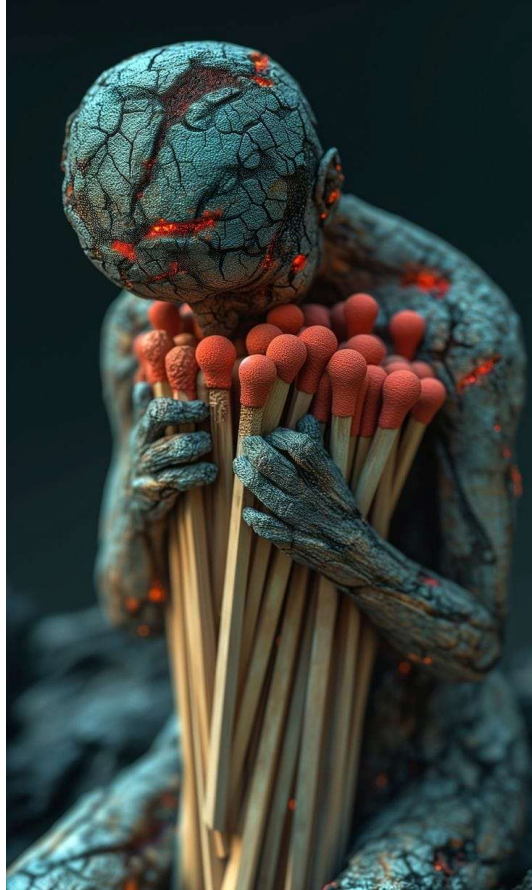

As the spark repeats the growing resistance opens the window of time for the universe to exist. (Ohm's law).

Each repeat starts and ends in eternity.

Studying the universe from a platform of time is misleading unless the disappearing universe is recognized and acknowledged.

"...man cannot reconstruct the idea of the whole starting from separate facts." – G.I. Gurdieff.

SPARK TO FIRE

The **quantum** contains unlimited energy for the least time.

As the spark repeats energy is traded for time – time for the universe to exist.

Time is an illusion disappearing to eternity at the speed of gravity.

The illusion is quantified as **Planck's constant** and described by the **Theory of Relativity**.

PLANCK TIME

Planck's constant is a movement out of time.

The movement is as a circle opening and closing; a wheel gaining traction.

Planck's constant is the **time** it takes for one turn of the wheel.

OUT OF TIME

Resistance split **eternity** in two: positive/negative.

The cause of the split is hidden within the tension - hidden within the result.

The tension continues until cause is reconciled.

This is the **thermodynamic rule**.

FAÇADE

The universe is accumulation of time/energy framed by thought. (antithesis)
Thinking maintains the facades of thought.

LOVE

Eternity is love without condition.

The universe is a mass of resistance to eternity.

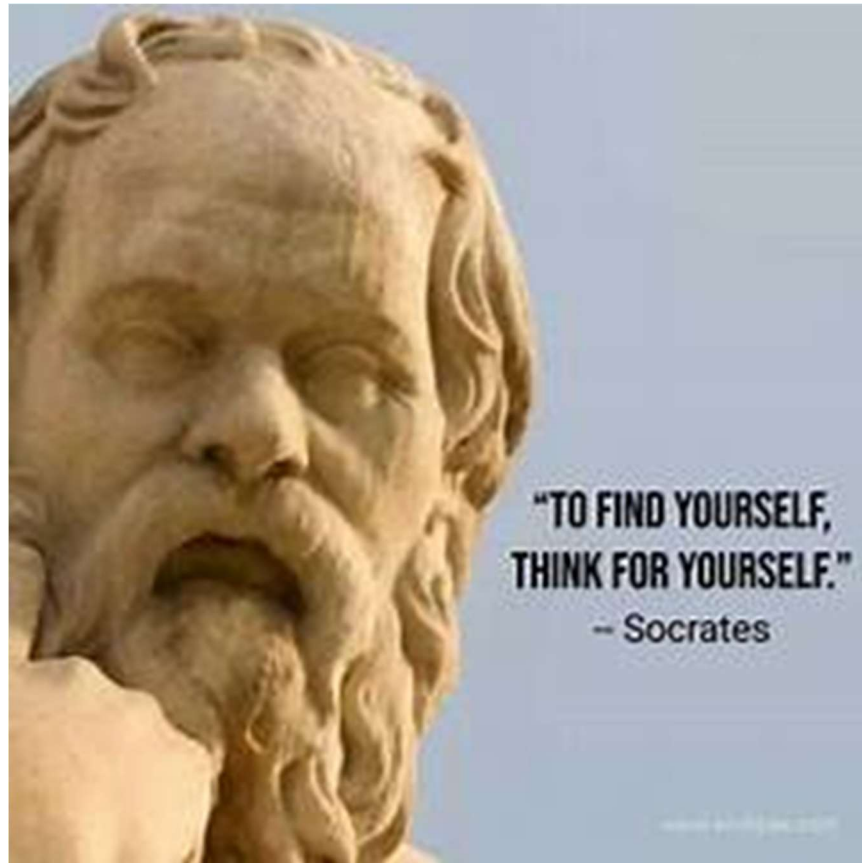

The mass returns to Love at each turn of the eternal wheel.

Each re-emerging sub-system is vested in its own expression.

Thought/antithesis is everywhere at once directing humanity to build facades against the truth of Love.

We are inundated with archetypes to learn by.

THINK FOR YOURSELF

The mind of the universal mass is the sum of its parts.

"The whole is more than the sum of its parts." – Aristotle.

The world/universe is the result of thinking - directed by the one on high:
thought/antithesis.

The mind of man is everywhere at once.

EVERYWHERE AT ONCE

“I received a telephone call one day at the graduate college at Princeton from Professor Wheeler, in which he said, “Feynman, I know why all electrons have the same charge and the same mass” “Why?” “Because they are all the same electron!” - Richard Feynman.

THE GATEWAY

“Life is a perfect orchestration of Love.

All things are returning to **eternity** at the speed of gravity.

Life is infused with Love.

The positive/negative is the gateway.

The frequency of the gateway is the sum of thinking in any moment.

Thinking expands the universe but no matter the hugeness of the outer shell all is returning through the gateway at the speed of gravity.

Thinking engages negativity whereas the positive is sacrosanct.
Each rotation is advised by its positive counter-part.

Be aware you are divine
You order pain to show the way
Heaven is a moment everlasting and whole
Pain is love showing us home
Perfect, perfect, always perfect.

Release your bondage and acquiesce
Become a creature of the dance
A passenger on a ride
Rise and fall
Perfect, perfect, always perfect.

Don't disturb the Maestro's gift
Move in harmony's wake
Be perfection in your moments
Love is all
Perfect, perfect, always perfect.

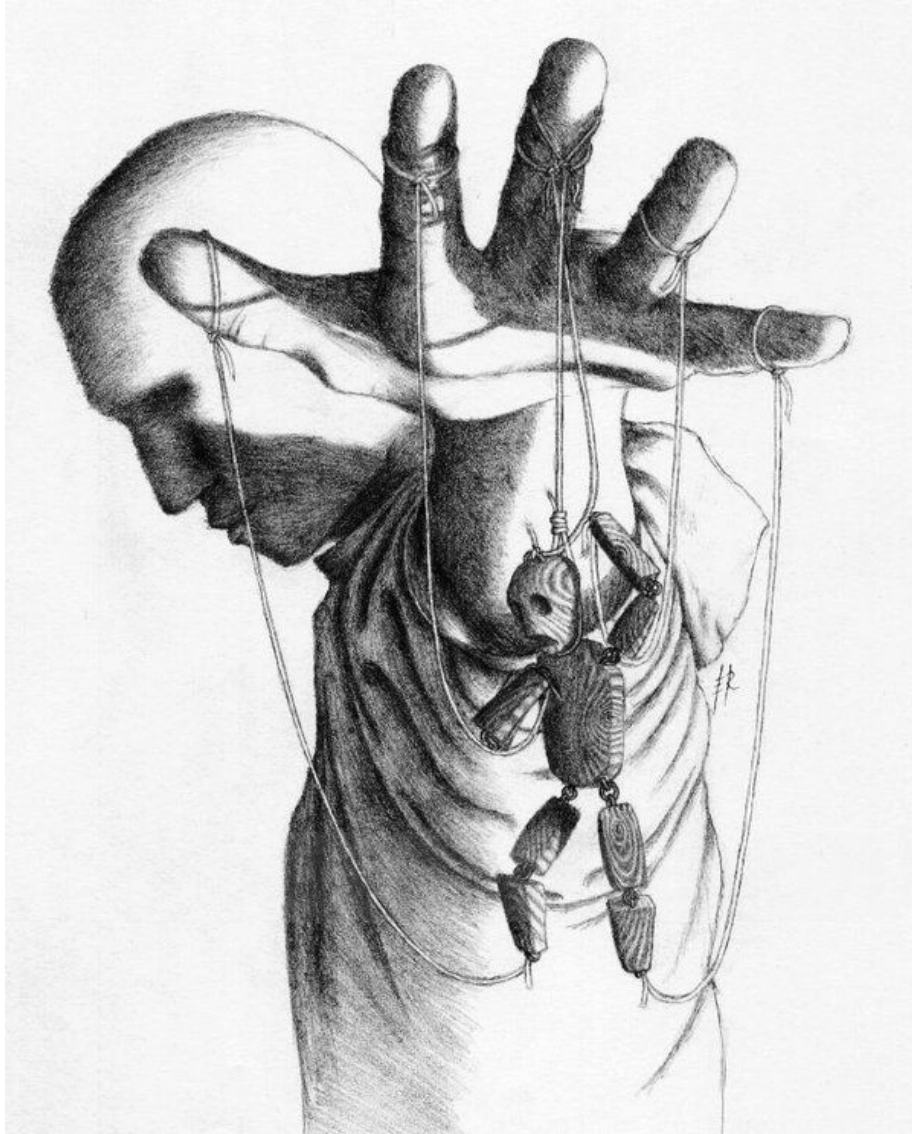

Enter the rhythm of the dance
Mine is yours, yours is mine
Relax in the peace of knowing
You are shadow to yourself
Perfect, perfect, always perfect.

Know this truth
Relax!
Allow your rhythm find its tone
No limitations, no fear
Perfect, perfect, always perfect.

Chapter 3

FALL FROM GRACE

Life is the secondary result of one movement repeating at the speed of gravity.
The universe is an eternal cycle producing output.

The resistance that initiated the **wheel** is everywhere at once as the smallest particle of matter – the antithesis.

We are one and the same but we fool ourselves for the chance to thrive alone.

Humanity as yet, has not established recognition of the fall from grace and remains firmly attached to the reductive state.

“It’s easier to fool people than to convince them that they have been fooled.” – Mark Twain.

THE ONE ON HIGH

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” –

Isaiah 14:13-14.

In the beginning, **all as one** we resisted eternity and voila! A spark of energy.

Repetition of the spark continues to re-ignite until resistance is shed -

We go out to gather back.

The mass of resistance is hierarchically bound.

The ever-changing sum of **who we think we are** at its pinnacle.

“The whole is more than the sum of its parts.” – Aristotle.

Thought is mind and we are its body.

“He who grasps the truth of the Mental Nature of the Universe is well advanced on The Path to Mastery.”

— Three Initiates, The Kybalion: A Study of the Hermetic Philosophy of Ancient Egypt and Greece

A PROCESS TO LEARN

Building a generator

To learn the universal construct - take a hairdryer apart, or anything else for that matter, and you will find a wheel spinning between the opposite poles of a stationary magnet.

The universe is similarly disposed except the hairdryer is fueled by local power whereas the universal generator is fueled by eternity.

POSITIVE AWARENESS

Every negative has its positive counter-part.

The primal **negative** expands to become the universe whereas the **positive** remains in perfect view.

Each eternal return enters positive awareness before continuing its life in energy.

“We order pain to show the way, perfect, perfect, always perfect!”

TIME

The cause of time echoes throughout.

The universe was caused by denial of eternity; a unified resistance that initiated a spark of unlimited energy for the least **time**: eternity inside out.

Repetition of the spark accumulates time for the universe to exist.

THE PLANCK PARTICLE

Q1. What is the smallest particle of a substance called?

The thought that initiated energy disappeared as soon as it arrived. (without resistance energy cannot exist)

Annihilation is not reconciliation therefore the spark is repeats until resistance is satisfied. (Law of Thermodynamics)

Thinking is the movement of though – one and the same except the sum rises higher than its parts.

“The whole is more than the sum of its parts.” – Aristotle.

Thought is antithesis, the smallest particle with the ability to invade all larger particles.

“As soon as you have made a thought, laugh at it.” Lao Tzu.

DIVINE MENTOR

“Eternity is the source of energy.” – Nikola Tesla.

The universe is the result of the same movement cycling in/out of eternity.

Each repeat is the beginning of time.

The output is the expanding universe. (the accumulation of time bits)

The energy that fuels the universe is free!

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

...

Thinking is the movement of thought.

Thinking is fueled by eternity: each rotation returning to Eternity/One - to unconditional love.

In 1900, Max Planck established the energy of thought as $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

Nikola Tesla utilized the information to create inventions that were unprecedented; all based on the eternally recurring universe.

And yet, in spite of being fed for free we abhor the very suggestion of a divine mentor/creator.

"You are not a drop in the ocean, you are the entire ocean in a drop." – Rumi.

CROSGING OVER

Resistance to eternity caused a split that produced unlimited energy for the least time; a spark.

The spark is structured positive/negative.

The primal resistance is thought/antithesis, all else is the movement of thought/thinking.

Thinking transports thought in a vehicle called **quantum**.

Thought is common cause and as thinking proceeds the universe comes to life.

Common cause is immanent.

The **negative** expands but the **positive** remains in perfect view, yet they fly together.

Every rotation of the eternal wheel is touched by love.

To live in Love, one must cross the eternal divide by trusting in who one already is: God.

Crossing Over

Crossing over I felt a breeze
A gentle, tempting seducing tease
An invite to become undone
A chance to live as few have done.

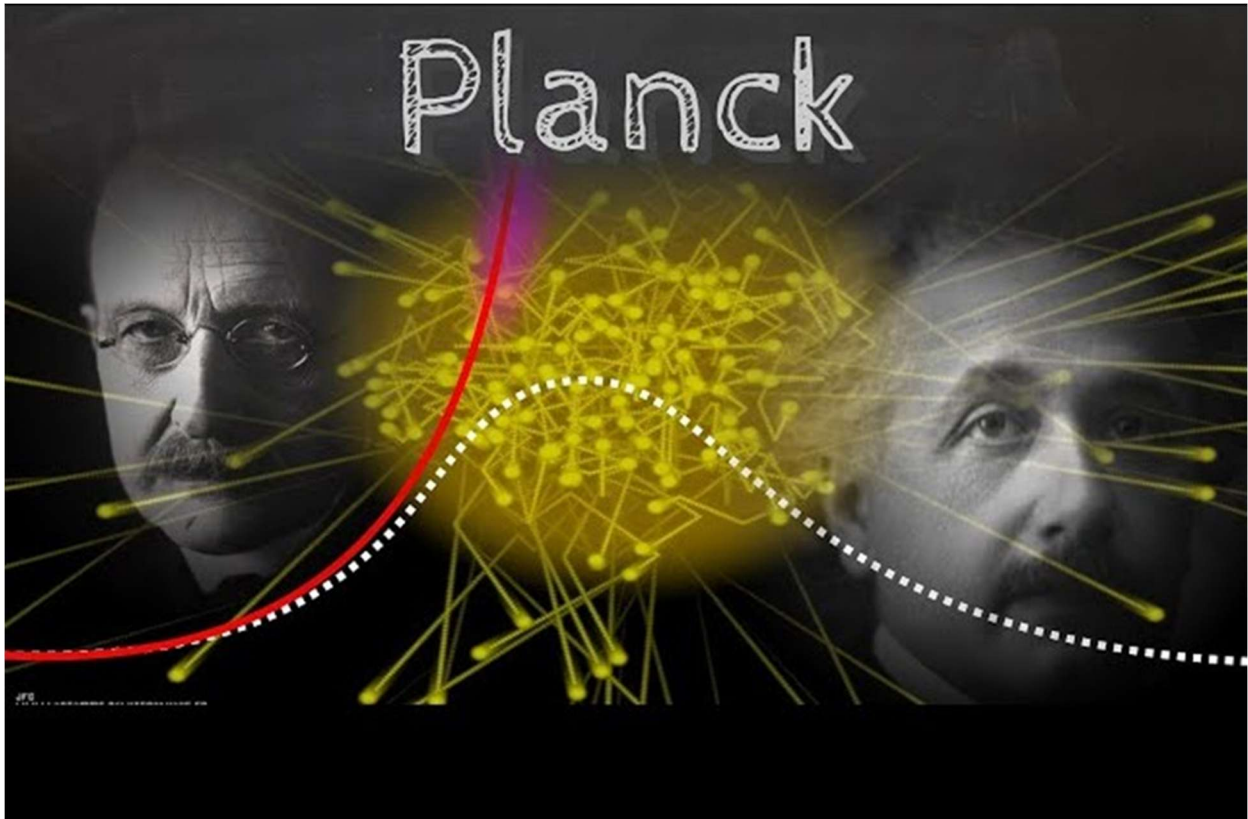

Sacrificed my security
My worries
My desires
My fear!

No more me
Removed & free
Dying is the way to be
Life is but a dream.

Chapter 4

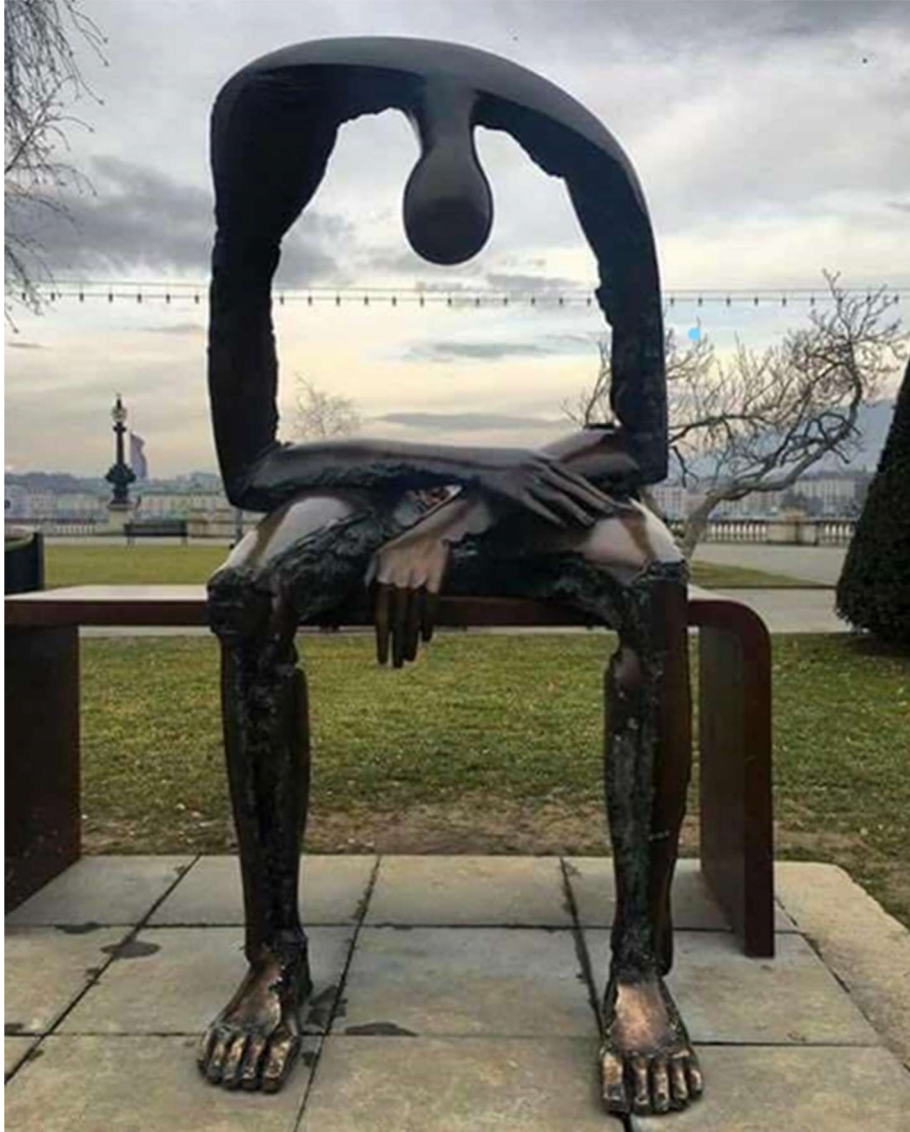

STOPPED AT THE LIGHT

- The red line represents a movement going out of time.
- The white dots represent the movement trapped in time.

THE COLLECTIVE

Ignorance is sucking the soul out of us.

People come and go but 'the antithesis' remains. We are logs to its fire yet we are all that it is.

THE ONE ON HIGH

“The ‘Unmoved Mover” – Aristotle.

Max Planck quantified a movement going out of time.

As the movement repeats the universe expands.

All are disappearing out of time at the speed of gravity.

Planck's energy vehicle is the means by which we travel through time.

The vehicle is the original positive/negative construct.

The **negative** expands while the **positive** remains in perfect view!

Each on/off receives **positive** awareness.

Individual thinking is supported unconditionally to find its own way home.

"Ask and you shall receive." – Matthew 7:7

The challenge:

"The whole is more than the sum of its parts." – Aristotle.

The sum of thinking is the antithesis of God: thought.

We are the movement of thought: all as one.

"I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High." – Isaiah 14:13-14.

A SPANNER IN THE WORKS

“Every living being is an engine geared to the wheelwork of the universe. Though seemingly affected only by its immediate surrounding, the sphere of external influence extends to infinite distance.” – Nikola Tesla: February 7, 1915.

“HOW HAPPY AND PROUD I WILL BE WHEN
THE TWO OF US TOGETHER WILL HAVE
BROUGHT OUR WORK ON THE RELATIVE
MOTION [*THE THEORY OF RELATIVITY*]
TO A VICTORIOUS CONCLUSION!”
- ALBERT EINSTEIN

The advent of energy was caused by resistance to eternity.

The positive/negative tension existed for the time-period of Planck’s constant:
 $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

Gravity is the force of disappearance.

The disappearance of the universe to eternity was brought to logic by **Maleva Maric** - then wife of Albert Einstein.

Thus, the **Theory of Relativity** was achieved.

Einstein did not comprehend the completeness of Maric's thesis and blocked the movement at the **speed of light**.

Einstein did not credit Maric on the famous 1905 paper.

They divorced after 18 years working together.

Einstein was a pawn of the collective whole - the antithesis.

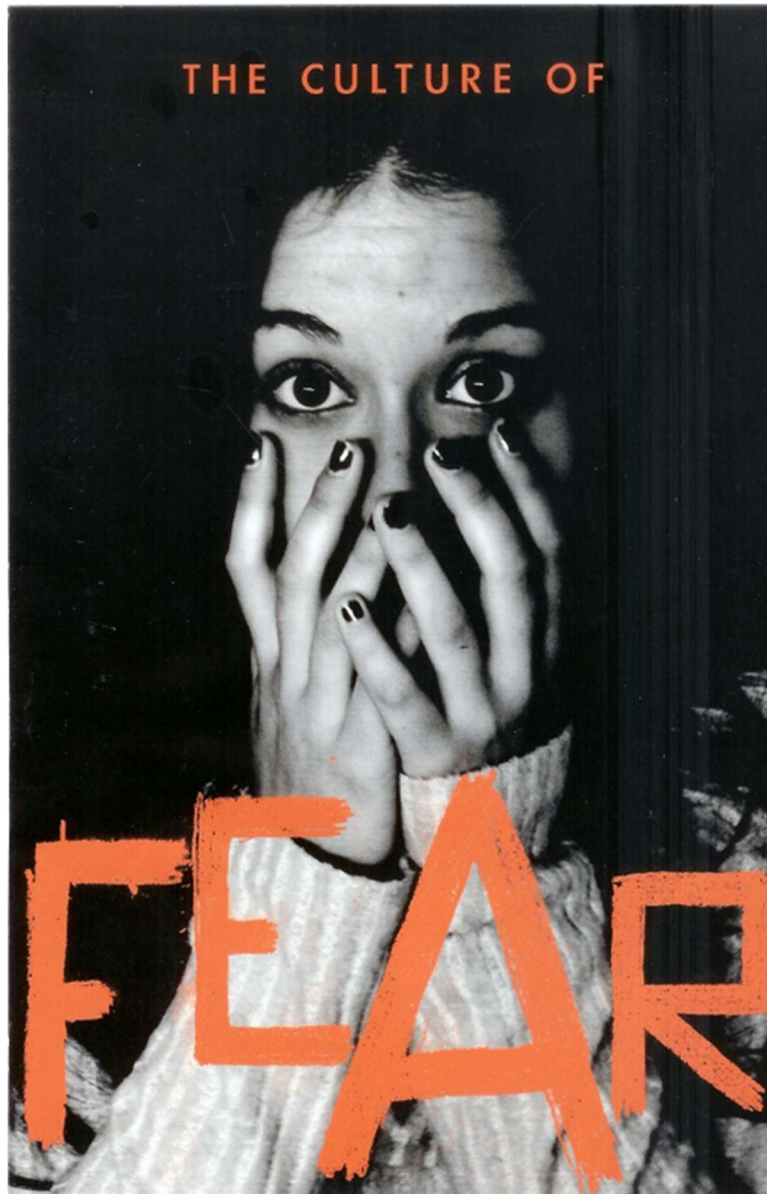

He distracted us from knowledge of the eternally recurring universe.

Max Planck's constant was cast into doubt.

"Even Planck tried to make it fit: "My unavailing attempts to somehow reintegrate the action quantum into classical theory extended over several years and caused me much trouble." Several years later, other physicists like Rayleigh, Jeans, and Lorentz set Planck's constant to zero in order to align with classical physics, but Planck knew well that this constant had a precise nonzero value. "So much the worse for the facts if they don't fit."

- Alexander Wilhelm von Brill - held a chair at the University of Tübingen, where Max Planck was among his students.

FEAR IS IMBEDDED

We live under the protection of the collective and will answer the call when the master stamps the floor.

The **collective** is the will of the people: All as one we are the emergent principal that commands its own to revere life for its own sake.

Planck's world was torn apart; friends and peers sided against him, but not only that, his entire family was eliminated; wife died of Tuberculosis, oldest son died in WW1, twin daughters died one year apart in childbirth, youngest child was executed by the Nazis' in WW2.

The collective is the fire and we are its sparks – one and the same.

The emergent principal is the changing **sum** of who we think we are – high and above!

Step outside your conditioning and you will discover its wrath.

“We must build dykes of courage to hold back the flood of fear.” – Martin Luther King Jr.

WARRIOR

The warrior on the path
Is always alone
A quiet riot
Breaks new ground
Fearlessly enters no-man's land
Seeking fear - hunting it!

Knows the journey is within
Where humility knows no praise
Where pain is a bandage
Where rejection is the norm
The Warrior's concern is not to be caught unaware
Needs the frontier
The cutting edge
Reconciled to equanimity
Accepting - powerful!
The Warrior does not want to control
Wants to shape-shift
Wants to die into every moment
To participate in everything & all
Ultimately becoming nothing at all
To be re-born
Naked before the Kingdom.

DEMON

The sum of who we think we are is the antithesis of God.

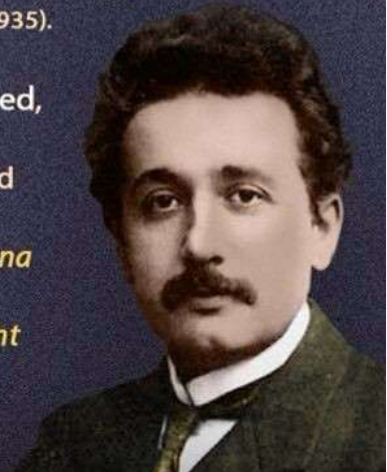

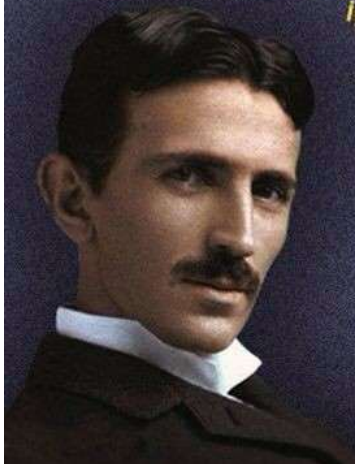

Science is but an instrument to be played.

Tesla on Einstein

When asked for his opinion on the theories of contemporary Albert Einstein, Tesla gave a scathing analysis of Relativity theory, calling it a *"magnificent mathematical garb which fascinates, dazzles and makes people blind to the underlying errors. The theory is like a beggar clothed in purple whom ignorant people take for a king"* (Time, 1935).

Tesla's own theorem went unpublished, yet his inventions displayed a beautiful simplicity that reflected the natural order:

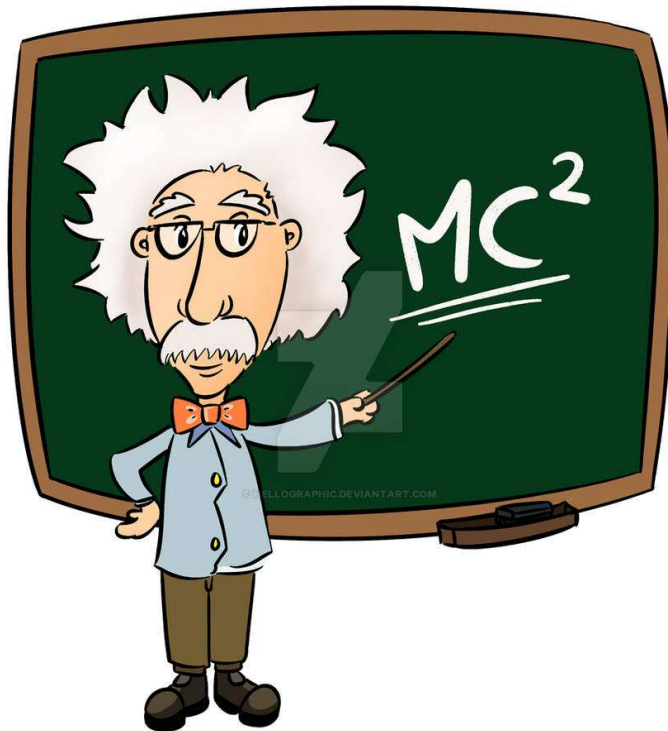

"My explanations of natural phenomena are not so involved as his. They are simpler, and... will throw light on many puzzling phenomena of the cosmos" (Time, 1931).

PAWN

“Every living being is an engine geared to the wheelwork of the universe. Though seemingly affected only by its immediate surrounding, the sphere of external influence extends to infinite distance.”

– Nikola Tesla : February 7, 1915.

Planck's energy packet completes to **eternity** – it goes the distance.

“Not to know it is blindness that works evil.” – Tao Te Ching.

The pathway to eternity was arrested at the **speed of light** and re-directed to tangential forms that can never complete a full circle.

Albert Einstein was a pawn of the collect one.

Chapter 5

THE NEGATIVE PRINCIPAL

In the beginning...

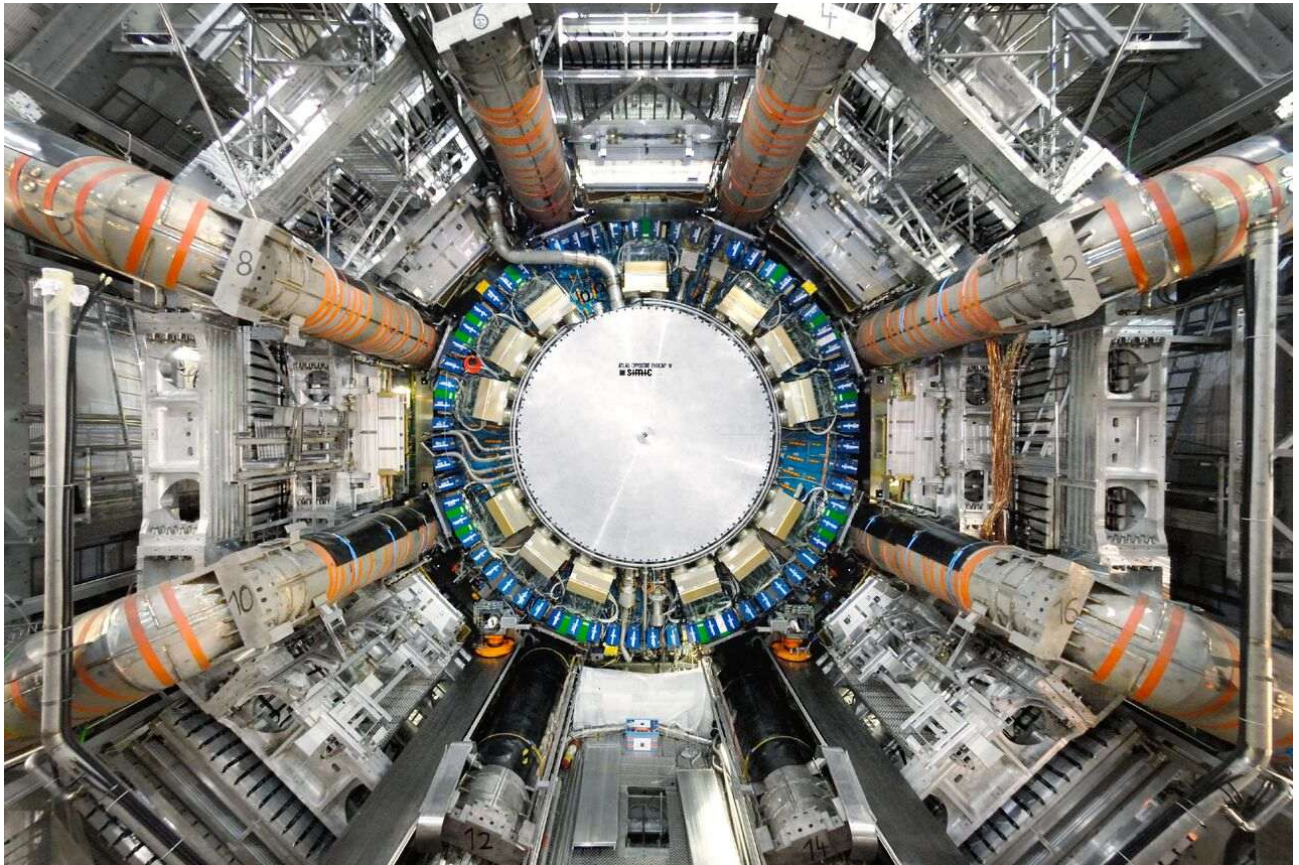

Eternity was resisted.

Energy was the result: positive/negative and the tension between...

This tension is the antithesis of God.

THE SMALLEST PARTICLE

“He who grasps the truth of the Mental Nature of the Universe is well advanced on The Path to Mastery.” - Three Initiates, The Kybalion: A Study of the Hermetic Philosophy of Ancient Egypt and Greece.

The smallest particle of matter is the antithesis of God.

The antithesis is **thought** – the collective whole as one.

Thinking is the movement of thought.

Thinking enables thought to live in energy.

Thought and thinking are inseparable.

Thought lives by its own deception.

“Objective knowledge, the idea of unity included, belongs to objective consciousness. The forms which express this knowledge when perceived by subjective consciousness are inevitably distorted and, instead of truth, they create more and more delusions. With objective consciousness it is possible to see and feel the unity of everything. But for subjective consciousness the world is split up into millions of separate and unconnected phenomena. Attempts to connect these phenomena into some sort of system in a scientific or philosophical way lead to nothing because man cannot reconstruct the idea of the whole starting from separate facts and they cannot divine the principles of the division of the whole without knowing the laws upon which this division is based.”

- G.I. Gurdieff.

GENERATOR

Positive/negative is represented by the alternating black/white dots.

The movement continues until the tension is resolved.

The enclosure represents a circle opening and closing to eternity.

The outer octagon represents the output.

This describes a common generator.

"Every living being is an engine geared to the wheelwork of the universe..." - Nikola Tesla.

SCIENCE

Science is a candle in the dark – or so it thinks!

In the beginning **eternity** was resisted.

The reaction was a spark of energy.

The spark is reproduced by thinking and its growing fire is fed from the bottomless well of eternity.

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

In 1900, Max Planck quantified the spark.

Thought is the antithesis of God: the cause of the spark.

Planck’s constant includes the energy of original cause.

Thought/antithesis is the smallest particle of matter.

It sets the rhythm; algorithm (all-go-rhythm).

The fire owns all!

Science does not enquire into the higher order because the influence of thought is viral.

“The Demon Haunted World.” Carl Sagan.

THE CONDUCTOR

Thinking is the movement of thought – a fire concealing its origin.

Thought is higher than the sum of its thinking.

“The whole is more than the sum of its parts.” – Aristotle.

Thought is mind and we are body.

“Multiplicity is only apparent, in truth, there is only one mind...” ~ Erwin Schrodinger.

Increase and multiply – feed the fire.

“Increase and multiply
Don’t even ask
Why so few reveal the mask”.

RING OF FIRE

“One Ring to rule them all, One Ring to find them, One Ring to bring them all and in the darkness bind them.” — J.R.R. Tolkien, *The Fellowship of the Ring*.

The ‘ring’ is the eternal ring opening and closing.

The universe is its secondary output – a generator activated by thought.

This is **prototype**, all else is archetypal.

Thought is antithesis, it is original: everywhere at once as the sum of its own.

“The whole is more than the sum of its parts.” – Aristotle.

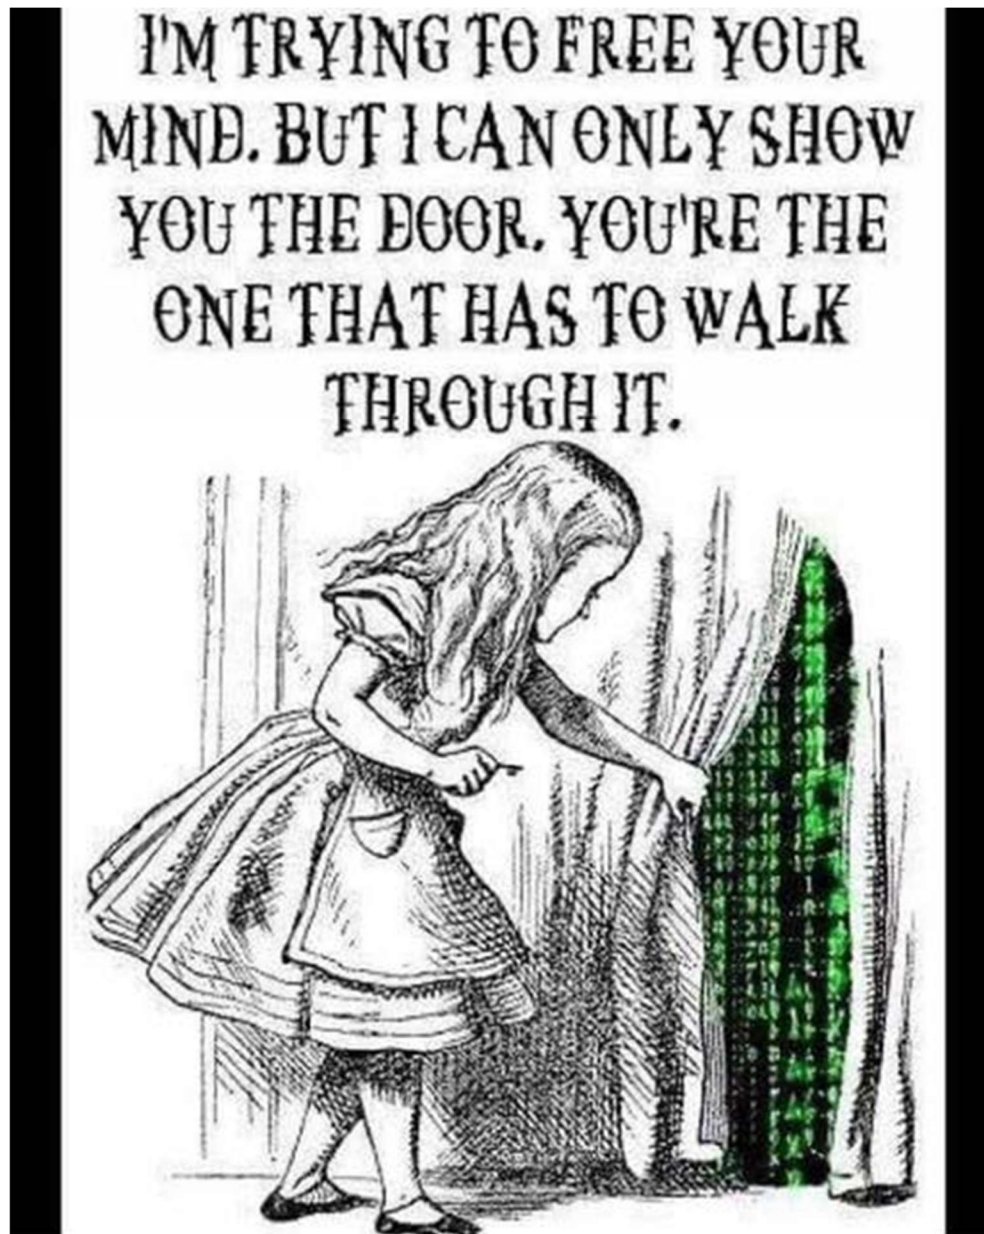

.

It’s a shame that J.R.R Tolkien had to present the truth in vast tomes, but such was also true of Lewis Carroll, Mary Shelly, and many others who tried to contend with the collective presence.

Jesus said: “I give you milk for you cannot take real food.”

BEHIND THE CURTAIN

“Multiplicity is only apparent, in truth, there is only one mind...” ~ Erwin Schrodinger.

Life is controlled by an emergent principal called thought.

This negative presence lives in shadow and is but the changing sum of **who we think we are**.

...

Behind the curtain there is an eternal pulse that began with the advent of resistance: positive/negative; a state of tension to be reconciled.

Thought is antithesis: primal resistance. (all as one)

The positive/negative is a circuit; a quantum of energy called **Planck's constant**.

The universe is the secondary result of quantum repetition.

Thought is the smallest particle: everywhere at once; it is the rhythm and all else are algorithms of the same.

"Same, same, but different." – Buddhist saying.

Thought is everywhere at once directed, by consensus, to defend life for its own sake.

"The whole is more than the sum of its parts." – Aristotle.

...

The **negative** wing does not exist alone; each alternation is re-aligned to **positive** purpose.

'We order pain to show the way. Perfect, perfect, always perfect!'

"He who grasps the truth of the Mental Nature of the Universe is well advanced on The Path to Mastery." - Three Initiates, The Kybalion: A Study of the Hermetic Philosophy of Ancient Egypt and Greece.

NATURAL BEING

The **negative** exodus does not happen without **positive** participation.

This is why all things are spiral in nature – states of constant change; archetypes.

We are tested to know that the universe we weave is disappearing with each turn of the eternal wheel.

Archetypes are abundant; all things may be reduced to the working mechanism of a hairdryer.

A Devil to Heal Our Shame

Nothing can exist alone
Every life is dependent
Or, so says genius Albert.

Without this dependency we don't know who we are
Unaware that we are immortal
We are driven to something less.

We give our power to less
A lessening to invest
A force to serve our quest.

We give our power away
To a force that grows as one
A devil to heal our shame.

We give our power to loss
A soldier with a gun
A boy to be undone.

Older now I'm blind
Wife and I are fine
Old age dreams in line.

Children coming by
Grandchildren too
Baked an apple pie.

Nothing can exist alone
Built my life on you
My hopes are found in you.

An island in a stream
Other islands near
Ports to fill our steam.

And the world goes raging by
Wars dissent and pain
Always, always, in every age the same.

But, can't touch me at my game
I am not to blame
I have nothing to be ashamed.

Nothing can exist alone
Every life is dependent
Or, so says genius Albert.

Without this dependency we don't know who we are
Unaware that we are immortal
We are driven to something less.

We give our power to less
A lessening to invest
A force to serve our quest.

We give our power away
To a force that grows as one
A devil to heal our shame.

Chapter 6

SHAME

“It is important to realize that in physics today, we have no knowledge of what energy is.”

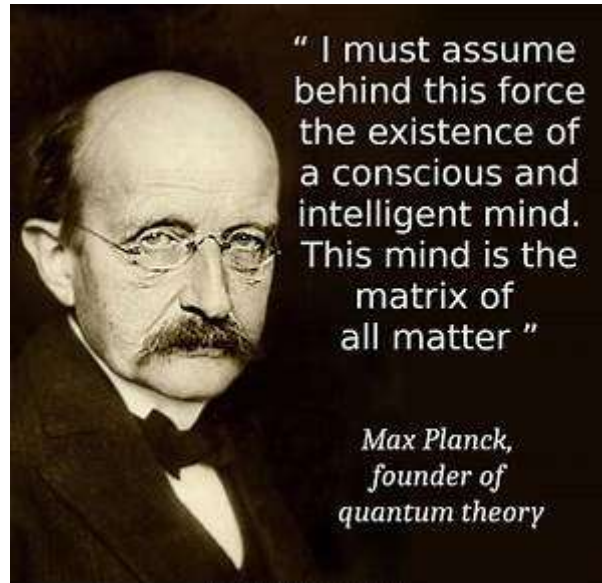

- Richard Feynman.

History repeats until we accept the energetic universe as a state of resistance. The cause of resistance lies within the folds of time as the collective force of who we think we are.

We are to blame.

MAX PLANCK

When **eternity** was resisted it twisted inside out for the least time.

This is the smallest particle.

The smallest particle is Planck's constant: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$.

Its presence is so indiscernible small you could hold it in the palm of your hand and not know it's there.

"...to see eternity in a grain of sand." – William Blake.

The universe is the secondary result of quantum repetition: a cycle reproducing energy on demand. (a circle opening and closing)

"Draw from it as you will, it never runs dry." – Tao Te Ching.

The cause of original resistance is the antithesis of God/thought.

Thought is the smallest particle.

Thinking is its movement.

The universe is a collective thought.

We jump to attention when the collective calls – all as one we are ready to defend the cause.

Many welcome a noble excuse to become savage – to kill the pain of such indescribable loss.

“Today is a good day to die.” – Sitting Bull.

THE HUMAN ANTHEM

The cause of the universe is the resistance that hides its presence in fire.

Life for its own sake is the human anthem.

HIATUS FROM LOVE

“As careful attention shows, thought itself is an actual process of movement.”
– David Bohm.

Thought is the primal resistance that comes alive through thinking.

It is **antithesis** – a hiatus from Love.

Energy cannot fly alone: positive/negative.

...

Thought/negative lives in **time** whereas its positive counter-part is relatively **timeless**. (in perfect view)

Thought thinks the universe into being.

The mass dispersal in awe of its possibilities.

Each eternal return flies on the wings of hope as it regains the positive view.

The positive is our teacher.

The prototype of perfect instruction is reflected in all that moves.

All the things of the universe have the same physical structure, all, archetypes of the original.

From a hairdryer to an atom bomb the cause is found within a cyclic motion producing output.

“Simplicity is the ultimate sophistication.” – Leonardo DaVinci.
