

THE HAIRDRYER CHRONICLES

BOOK 2

Work in Progress...

We must start from the beginning.

The world/universe is the secondary result of one eternally recurring movement.

"Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven." - Matthew 18:3

"Hold eternity in the palm of your hand." – Wm. Blake.

The eternal exodus began when eternity was twisted from one is all to all as one.
The twist instantly re-shaped to a circle that shorted back to eternity.
The condition repeats until all is reconciled.

This is eternal recurrence: a wheel turning to produce output – a generator.

The output is the means to resolution.

Each turn of the eternal wheel generates **free** energy/time for the work to be done.

Each turn produces an archetype of the original.

The teaching tools are all around us.

AS THE WHEEL TURNS

One **is** all describes eternity.

Eternity experienced resistance and twisted as if poisoned.

We are eternity with an illness to be healed.

The convolutions continue until we are well again.

We would rather suffer than discover who we are.

“People will do anything, no matter how absurd, in order to avoid facing their own Soul.” – Carl Jung.

One **is** all means everything is God – NOW!

The resistance that caused eternity to ‘do the twist’ is an electrical circuit: the first moment of time.

As the circuits repeats time follows.

The cause of the first resistance is unknown but will be known when we have recovered from our illness.

Each twist is the same resistance accumulating time for us to heal.

This is a cycle producing output. (a generator)

We are psycho-emotional constructs with little or no awareness of where our energy come from.

"It is important to realize that in physics today, we have no knowledge what energy is. We do not have a picture that energy comes in little blobs of a definite amount." – Richard Feynman.

The ‘little blobs’ are the pulses of energy generated to produce time for reconciliation.

THE EXODUS

The little man turning the wheel is **thought**, we are the movement of thought – forms of thinking.

“Same same, but different.” – Buddhist.

The big man uses the circular medium to maintain the exodus - we must go out to gather back of our own will.

**“Do not seek progress as
Progress exists only in time
The goal stands
Outside of time.”**

- Wu Hsin (400BC)

HOMeward BOUND

All of life is an attempt to gather back to home/eternity.

This cannot begin until we discover where home is.

“The wind blows wherever it pleases. You hear its sound, but you cannot tell where it comes from or where it is going. So, it is with everyone born of the Spirit.”

– John 3:8

We are here to learn our way home through the experience of energy.

Energy began with denial of eternity.

All as one we resisted and the energy twist that followed took the least time before untwisting back to eternity.

Each repeat has the same energy – **free**, on demand!

The quantum of energy repeats in stops and starts, and the secondary accumulation enables time/energy for the work to be done.

The universe twists and returns until the way is clear.

THE BEAST OF OUR DISCONTENT

Eternity is completion.

One is all.

This is the knowledge we avoid because it requires letting go of who we are, in deference to who we think we are.

We simply don't believe in ourselves.

To understand our weakness in the face of truth it is necessary to realize that as the universal wheel turns through eternity it emits a collective mass of resistance that is controlled by its own sum.

The mass serves the collective will.

Individually we avoid responsibility but collectively we are ferocious.

The beast of our discontent has no life of its own.

It is who we wish to be without admitting it.

All that happens is by consensus, there is no other

MORE THAN WE THINK

The world/universe is the secondary result of one eternally recurring movement.

“The whole is more than the sum of its parts.” – Aristotle.

In the beginning **eternity** was twisted inside out for the least time.

This was the first electric circuit: positive/negative/resistance.

The first circuit was outside of time, or time as we relate to it.

It was the **wheel** before it began to move.

Each turn of the wheel increases negativity/resistance whereas its positive counterpart remains constant - at the right hand of God/eternity.

The positive answers each negative with absolute clarity.

But we refuse because the demon has us under its wing.

The demon is the sum of who we think we are – there is no other.

“The whole is more than the sum of its parts.” – Aristotle.

“Within the structure of the universe there is a demon that is very specific to everything that owns form, especially the human form. It exists in all things equally just as does its complementary opposite God. The battle rages on levels of discontent that have no awareness in time. It takes a powerful awareness to expose this demon because it is the pervasive element behind all activity. It is the hidden fool pretending to be aware of nothing while it exists in complete awareness.”

- Excerpt; The Trinity Conspiracy by Tom Kitt (2003)

CATCH ME IF YOU CAN

The world/universe is the secondary result of one eternally recurring movement.

Eternal recurrence is a movement disappearing out of time only to continue re-appearing until the resistance that caused it is reconciled.

The first movement was an electric circuit answering to the attributes of positive, negative and resistance.

Each reappearance accumulates the same circuit.

Now, it may appear logical that the primal resistance is everywhere at once within the secondary universe.

But this is not the case because resistance knows no other but resistance, consequently, the mass of resistance is the sum of who we think we are in each new moment.

We are as stones using a bag of stones for protection.

No one can catch me at my game.

THE WING OF THE BEAST

The world/universe is the secondary result of one eternally recurring movement.

The universe is energy.

Energy began when the eternal One was resisted – ‘One is all’ became ‘all as one’ for the least **time**.

‘One **is** all’ is never separated from itself and the energy created by resistance is an eternal ‘twist’ that returns to balance in the least time,

Therein to continue repeating until its cause/resistance is shed.

God/eternity never leaves us and the energy twist is but an illusion, albeit a very convincing one.

The first energy/movement was: positive, negative and resistance.

The positive sits at the right hand of God and the negative is held apart by resistance.

This construct is the wheel of life.

As the wheel turns, resistance grows.

Resistance is never apart from its own sum - it is all as one.

Every turn of the wheel meets its positive opposite – perfect!

But, the sum of all fly’s higher than its parts – everywhere at once.

“The whole is more than the sum of its parts.” – Aristotle.

The secondary output is seduced by the sum of its own thinking.

This is the challenge we must face...

The challenge to see through the demon we have created to protect who we think we are.

THE WHOLE

A rock is stronger than its parts.

The world/universe is the secondary result of one eternally recurring movement.

The first energy was a movement: positive, negative and resistance.

The circuit was the blueprint for a wheel; the transport for resistance.

The means of exodus.

The birth of resistance occurred when, all as one, we resisted eternity, causing the **illusion** of eternity twisting inside out for the least time. The twist untwists in an instant but then continues re-appearing until the resistance is reconciled.

Thus, the growing resistant became its own issue to solve.

The sum of the resistant parts is stronger than any one – like a boulder to a stone.

We are locked in prisons of our own making and must learn where we come from before we can set our course to home.

This is the test of life.

The first circuit is positive/negative driven by resistance, and whereas the negative grows to become the rock of the universe the positive remains sacrosanct.

Each turn of the eternal wheel touches positive before re-assimilating into the whole.

“The whole is more than the sum of its parts.” – Aristotle.

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” –

Isaiah 14:13-14.

SETTING THE COURSE

If we don't navigate correctly, we'll be travelling forever.

Each human being is as a ship on the ocean without a means to navigate.

Mostly we find safe-havens and gather like-kind for protection.

We are all energy yet it appears that few if any are aware of how energy began.

Navigating the world is well accomplished but navigating one's soul is an entirely different matter.

The first energy was a reaction to resistance just as is all things.

The resistance began when all as one we challenged eternity.

This resulted the first energy which was an eternal twist that continues to pulse throughout the universe.

The 'pulse' is as a wheel turning, each rotation feeding the universe until the resistance is reconciled.

One wheel producing output is all there is.

The universe is an inundation of archetypes/replicas of the original movement.

To navigate home we must first know that the entire universe is the secondary result of this same wheel turning.

The wheel is the first electric circuit; a positive and negative divided by resistance.

As the wheel turns the negative expands whereas the positive remains.

Each turn is refreshed by the positive before assimilating back into the collective experience - the collective whole.

The individual is lost in this collective that protects its own like a watchdog.

The watchdog's ignorance is the sum of our ignorance.

This is the ultimate demon.

We complicate ourselves and the demon enables us to insist.

The way out from under this monster is to learn where we come from and set our course to home.

And, this is easier done than said for the demon is everywhere at once.

One must gain the wherewithal to apply the hairdryer archetype to its prototype, then to know that the resistance that caused the prototype as the antithesis of God.

The world is a twisted knot to be unwoven.

Eternal love is around every corner.

"Simplicity is the ultimate sophistication." – Leonardo DaVinci.

The THEORY of RELATIVITY explains the disappearing universe.

THE DISAPPEARING UNIVERSE

The world/universe is the secondary result of one eternally recurring movement.

“According to a theory proposed by theoretical physicist John Wheeler, who outlined his thoughts in a conversation with fellow physicist Richard Feynman there is only one electron – it just looks like there are a lot more because it is moving forward and backward in time.”

The entire universe is disappearing and re-appearing with the electron.

The value of the electron is $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$.

This is Planck's Constant.

It is also the Quantum.

The above information has been interfered with by the **sum** of who we think we are.

Because the universe is energy, everything is illusion – all
is possible.

ANTITHESIS

Eternity resisted itself and turned inside out for the least time.

‘Inside out for the least time’ is a twist of energy.

As the twist repeats it appears a circle opening and closing.

As the ‘wheel turns’ the universe expands as secondary issue.

The universe is a mass of archetypes of the original prototype.

One such archetype is a hairdryer or indeed anything at all without exception; take something apart and you will find a rotating wheel producing output.

The primal resistance caused the beginning of time.

The universe is accumulation of the same bit of time.

The ‘time bit’ has positive, negative, and the resistance that pushed it to happen.

The pusher/resistance is the antithesis of God.

As the wheel turns the universe comes alive in the negative collective.

The positive has a perfect view and does not move.

Each turn of the wheel is positively enlightened on its way to rejoin the collective.

The **positive** is the other side of the flipping coin.

"We are our choices." ~ Jean-Paul Sartre

THE BEGINNING

“Man cannot reconstruct the idea of the whole starting from separate facts.” – J.I. Jurdieff.

THESIS: One is all.

ANTITHESIS: All as one.

Energy began when Eternity (One is all) became All as one for the least time.

This was not a break with eternity for ONE is constant no matter how we disturb it.

The disturbance is a twist that opened and closed in the least time.

The twist, because it required movement was the first energy, thus, it was positive and negative separated by resistance.

The primal resistance is all as one for the least time.

As the twist repeats the universe expands.

Should we resolve our resistance, we will know that we are its cause.

One and the same.

"The world needed to suffer in order to understand the simplest of universal principles, the unity of man with man and with God." – Walter Russell.

Meanwhile, we must learn the way of things and this cannot happen from any point within the problem.

We must start from the beginning.

"Objective knowledge, the idea of unity included, belongs to objective consciousness. The forms which express this knowledge when perceived by subjective consciousness are inevitably distorted and, instead of truth, they create more and more delusions. With objective consciousness it is possible to see and feel the unity of everything. But for subjective consciousness the world is split up into millions of separate and unconnected phenomena. Attempts to connect these phenomena into some sort of system in a scientific or philosophical way lead to nothing because man cannot reconstruct the idea of the whole starting from separate facts and they cannot divine the principles of the division of the whole without knowing the laws upon which this division is based."

~ G.I. Gurdieff.

LIVING BY CONSENSUS

Thinking grows one bite at a time

One is all, means any-thing when released from the resistance that binds it, is **God**
The universe began when eternity resisted itself; twisting inside out for the least period of **time**.

Time and energy are synonymous and the energy of the first issue is Planck's constant: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$.

Planck's constant is an illusion of power by all as one – the first bite.

The universe is secondary accumulation of the same bite of energy.

The **one** remains high above the subsequent accumulations of time that is the human experience.

All as one, we resisted eternity and all as one we live by consensus.

We use the collective deception to promote the world/universe at any cost - caring less for the peripheral damage incurred along the way.

The sum of who we think we are is an impersonal entity that is identical in all individuals.

Individually we feed the collective - there is no other.

“Probably none of my empirical concepts has met with so much misunderstanding as the idea of the collective unconscious.” – Carl Jung.

WE ARE ALL AS ONE

Humanity cannot solve itself from within the morass that is its own output. Individuals must learn where they come from in order to proceed with learning the truth of One being all; one must learn the difference between One is all and All as one.

The first energy was an eternal twist; a move inseparable from eternity; a disturbance.

We will be revealed once we have found the cause of the disturbance.

The twist was an emotion; an energy with positive, negative and the resistance that is back of it.

The resistance is the antithesis of God/eternity: first resistance is all as one for the least **time**.

All subsequence is complicit.

The sum of thinking is all as one.

All as one changes as we change.

One is all.

"I have failed in my foremost task to open people's eyes to the fact that man has a soul, that there is a buried treasure in the field and that our religion and philosophy are in a lamentable state."

~ C.G.Jung.

A STEP OUT OF TIME

A process of movement...

Everything in the universe is disappearing with the same eternally recurring wheel/circuit/frame.

The energy of the circuit is Planck's constant: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$.

Each recurring frame has this same energy but configured differently; the sum of thinking is the orientation of the frame before individuation.

Each movie is a story from the same thought.

"There is no thinker apart from thought; thought has made the thinker." – Krishnamurthi.

Thought is the antithesis of God – the primal resistance; everywhere at once directing the movies that we think we are.

The wheel is a repeating positive/negative: the negative grows to know whereas the positive already knows; the positive is sacrosanct whereas its complementary opposite is seeking.

We are the prize to be won and each action receives perfect response.

God does not make mistakes.

To help our process we must learn the universal construct and discover the antithesis/thought that framed it:

Take your hairdryer apart and you will find a rotating wheel producing output.

The difference between the hairdryer's generator and the eternal generator is the former draws its energy from a source (a/c, windmills, etc.) whereas the latter draws energy from eternity (free).

All aspects of thinking are the movement of thought.

"As careful attention shows, thought itself is an actual process of movement." – David Bohm.

INCREASE AND MULTIPLY!

“Keep them coming, don’t even ask why so few reveal the mask.”

Procreation is a fool’s game.

Eternity cannot separate from us - we separate from eternity.

One is all no matter what!

You are God no matter who you think you are in the meantime.

Eternity developed a desire to experience itself and all as one the thought twisted eternity inside out.

Eternity twisted and re-shaped in the least amount of time.

This was the beginning of time.

The emotion/thought was the first form of resistance and as the twist repeats the resistance increases and the universe comes alive as secondary issue.

Resistance and time are synonymous.

The objective of time is to gather back to eternity but the growing mass demands that the continuing evolution of energy takes precedence.

The sum of who we think we are is all as one – there is no other and it is thus by our own consensus that the universe is as it is.

Because there is no other, we defer to all as one, ‘passing the buck’ until someone points out the obvious.

But, at our current population the sum of who we are is a tragic monster eating itself alive.

“frightening thought that man also has a shadow side to him, consisting not just of little weaknesses- and foibles, but of a positively demonic dynamism. The individual seldom knows anything of this; to him, as an individual, it is incredible that he should ever in any circumstances go beyond himself. But let these harmless creatures form a mass, and there emerges a raging monster; and each individual is only one tiny cell in the monster’s body, so that for better or worse he must accompany it on its bloody rampages and even assist it to the utmost. Having a dark suspicion of these grim possibilities, man turns a blind eye to the shadow-side of human nature. Blindly he strives against the salutary dogma of original sin, which is yet so prodigiously true. Yes, he even hesitates to admit the conflict of which he is so painfully aware.”

~ Carl Jung, “On the Psychology of the Unconscious”.

Increase and multiply is the anthem.

We are obliged to gather back but the most basic requirement of involvement is the rationalization of procreation.

Children do not want to be born.

We must do the work for them.

“None of us stands outside humanities collective shadow.” - Carl Jung.

LA TABLA RASA

Energy is an eternal twist and the universe is the result of its repetition. This will continue until the resistance that caused the twist/disagreement is reconciled.

The twist is eternally re-occurring and we are its issue seeking resolution.

Each eternal twist is all as one for the least time.

Time is energy, energy is an illusion of movement.

As the twist accelerates the universe expands.

No matter the facts and figures of the world/universe all is disappearing with the twist.

All is within each twist and all is disappearing to eternity with the unfolding twist.

As individuals we must discover this phenomenon and take responsibility for participation.

The sum of who we think we are is the one to overcome.

The sum changes as we think.

To think positively we must rationalize the beginning and work from there, instead of from a point of view within the confusion.

Love follows each move we make and our eternal recurrence/constant beginning is a perpetual clean slate.

TIME FOR ITS OWN SAKE

Do not seek progress as
Progress exists only in time
The goal stands
Outside of time.
- Wu Hsin (420BC).

As we increase and multiply, we weaken our chances of reconciling time to eternity.

The world/universe emanates from the same eternal twist and the more we think the more twisted we become.

This is necessary for we must go out to gather back.

Where it began:

All as one we resisted eternity.

This was thought - an emotion that lasted for the least time. (energy)

Thinking is the movement of thought and no matter the gathering of time, all is disappearing to eternity at the speed of thought.

As the universe expands, thought becomes the sum of its thinking.

Mind over body.

At current population we have created a monster to guide our way;

We have institutionalized ignorance.

Our collective will imbeds' institutions that feed the fires of life, to keep it burning – to distract from learning who we are.

The collective supports life for its own sake and have reduced Love to contract form.

We come from Love and to Love we return.

Containing Love is a great evil.

It is incumbent upon us to learn where we come from – to stop indulging life as if it will solve itself.

We must learn what is actually happening in spite of what we choose to think:

ETERNAL RE-OCCURRENCE is a constant step out of time that is happening whether we agree or not.

Beginningless time and the present moment are the same. There is no this and no that. To understand this truth is called complete and unexcelled Enlightenment. - Huang Po: Master of the Universal Mind (850AD).

THE BELL IS TOLLING

“Whence come I and whither go I? That is the great unfathomable question, the same for every one of us. Science has no answer to it.” - ~ Max Planck.

The first positive/negative was maintained apart by a resistance that is the antithesis of God/eternity.

As the circuit repeats the resistance grows to become the body of the universe; a body whose mind is the changing sum of who we think we are.

The antithesis of God is the changing sum of who we think we are.

The mind of humanity is all as one.

As the body grows its quality of mind reduces.

The collective descends into levels of ignorance that protects against challenges to its tour de force.

The sum of who we think we are has the advantage of being everywhere at once; it is antithesis.

This sum of who we think we are is high and above:

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” –
Isaiah 14:13-14.

We are driven by a dangerous presence whose ascendant dynamic is the challenge we must face if we are to resolve our resistance to eternity.

This is a test created by who we are - One is all means everyone and everything is God.

Positive and negative are wings of the same bird but humanity resists the positive constancy that is manifest with each twist of the eternal revolution.

We are failing to rationalize our divine prerogative.

Science has no answer to it.

**“The monster is feeding in our garden
The bell is tolling
But we are oblivious.”**
