

THE BARGAIN

It is of utmost importance that we learn where we come from, otherwise we are just wallowing in a complexity that has no end as it is 'proved' at every turn. This is how we trick ourselves.

We come from the same eternally recurring movement and the cause of the movement keeps us in thrall.

"Every living being is an engine geared to the wheelwork of the universe..." - Nikola Tesla.

In and out of Eternity we go in an endless cycle pumping out life like a generator - drawing energy on demand - for **free!**

A deep pool it is, draw from it as you will; it never runs dry. ~ Tao Te Ching.

If we accept Eternity as the source of energy, then we may consider the resistance behind the eternal cycle/twist.

Resistance increases as the wheel turns.

The silent precursor is always the sum of 'who we think we are' no matter its resistant complement.

It is everywhere at once - all as one.

We are one and all, and all as one at the same time - we have our cake and eat it too.

Our ways of thinking are protected by the silent force of the collective.

A bargain with the devil.

"Man must recognize his complicity in the act of evil." - Carl Jung to his Soul, The Red Book, LN 291.
