

# THE ISAAC NEWTON PHENOMENON

"Science cannot solve the ultimate mystery of nature. And that is because, in the last analysis, we ourselves are a part of the mystery that we are trying to solve." ~ Max Planck.

The universe is energy.

Energy is movement.

The non-movement of that which is moving is its Reality.

All the things of the universe are illusions.

Reality is immanent.

We cannot measure reality because it is without reference.

Only energy can be measured but no matter the conclusions they too are illusions.

In 1687, Isaac Newton was credited with 'uniting heaven and earth'. Heaven was construed to be the cosmos.

Newton's  $F=ma$  is the infinite conclusion of all things to non-reference.

$E=mc^2$  is a crash-point on the way,  $F=ma$  goes the distance.

**"...the sphere of external influence extends to infinite distance."** ~ Nikola Tesla.
